SOURCE [REDACTED]

1. Conventional aircraft (see Annex 1)

In-line engine, landing gear retracting outward (source was not quite certain about these data).

2. Jet-fighter (see Annex 2)

Source believed that the craft was equipped with only one engine fitted in the fuselage. The stream-lined bodies were probably additional fuel tanks.

25X1A [REDACTED] Comment:

25X1X

[REDACTED] to clarify the date when the first jet fighters built in Plant No. 21 were seen. This, however, was not done. [REDACTED] statement that the craft was a jet plane with an engine under the fuselage and a conspicuous step in the fuselage. The question remains whether this craft was an experimental jet type produced in the plant or if it just happened to be there, an assumption which is supported by the additional fuel tanks under the wings.
